Professional Summary

Computer Science and Engineering graduate (Data Science specialisation), CGPA 8.07 out of 10, First Division with Honours. Skilled in machine learning, generative AI (Large Language Models, Retrieval-Augmented Generation, Vertex AI), full-stack development (React.js, Flask, REST APIs), and cloud platforms (Google Cloud Platform, AWS, Azure). Completed six internships spanning Google Cloud, Cisco Networking Academy, and ServiceNow. Published two peer-reviewed research papers; built a multimodal AI system achieving 91 percent classification accuracy. Seeking a Software Engineer, Data Science, or AI/ML Engineer role to design and deliver scalable, production-ready systems.

Education

Bachelor of Technology – Computer Science and Engineering (Data Science) November 2022 – June 2026
Noida Institute of Engineering and Technology, Greater Noida, Uttar Pradesh **CGPA: 8.07 / 10**
Minor Degree: Artificial Intelligence and Machine Learning • Final Result: First Division with Honours • Semester 8 SGPA: 9.67

Higher Secondary Certificate (Class XII) – ICSE Board April 2021
St. Joseph's School, Greater Noida, Uttar Pradesh **85.40 percent**

Secondary School Certificate (Class X) – ICSE Board April 2019
St. Joseph's School, Greater Noida, Uttar Pradesh **81.50 percent**

Technical Skills

Programming Languages: Python, Java, R, SQL, JavaScript, HTML, CSS, Node.js, PHP
Machine Learning and AI: scikit-learn, TensorFlow, Keras, NLP (NLTK, spaCy, Transformers), LSTM, Logistic Regression, Random Forest, SVM, Feature Engineering, LLM Fine-tuning, Transfer Learning
Generative AI: Google Cloud Vertex AI, Gemini API, PaLM, Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Prompt Engineering, Chatbot Development
Data Analytics and Business Intelligence: Power BI, Tableau, DAX, Microsoft Excel (Pivot Tables, Power Query), Data Warehousing, Exploratory Data Analysis (EDA)
Web and Full-Stack Development: React.js, Flask, FastAPI, REST APIs, Microservices, MySQL, JSON Integration, User Authentication
Cloud and DevOps: Google Cloud Platform (Vertex AI, BigQuery), AWS (S3, EC2), Microsoft Azure, Docker, CI/CD Pipelines, GitHub Actions
Networking and ITSM: Cisco IOS, Routing and Switching, VPN, LAN/WAN, Network Automation, Packet Tracer, ServiceNow (ITSM, Workflow Automation, Incident Management)
Testing and Tools: Postman, Selenium, Manual Testing, Unit Testing, Git, Jupyter Notebook, VS Code, IntelliJ IDEA, Unity (C#), Meta Spark Studio, Vuforia Engine

Work Experience

Software Development Intern June 2026 – July 2026
Codtech IT Solutions Private Limited (ISO 9001, AICTE Recognised) Remote
• Delivering production-ready software modules, REST API integrations, and full-stack features within a structured 4-week industry internship.

Generative AI Intern June 2025 – August 2025
SmartInternz – Google Cloud Partner Program Remote
• Engineered 3 production-ready LLM applications on Google Cloud Vertex AI; fine-tuned models for text summarisation and chatbot tasks, improving output relevance by 30 percent.
• Deployed a Retrieval-Augmented Generation (RAG) pipeline via BigQuery and Vertex AI; automated Python ETL preprocessing, cutting pipeline runtime by 25 percent.
• Shipped an AI Blog Post Generator using Vertex AI prompt engineering – topic and audience in, fully structured article out in under 10 seconds.

Networking Intern June 2025 – August 2025
Cisco Networking Academy Remote
• Completed 3 Cisco NetAcad labs (Networking Essentials, Cybersecurity, Packet Tracer); earned all digital badges; architected Cyber Shield – a 15-device simulated network with VLANs, firewall, site-to-site VPN, and web filtering.
• Authored Python network automation scripts, reducing manual configuration errors and cutting setup time by 35 percent.

percent.

IT Service Management (ITSM) Intern

May 2025 – June 2025

ServiceNow

Remote

- Configured end-to-end ServiceNow ITSM modules (ticket creation, SLA tracking, resolution); integrated REST APIs to build incident dashboards, reducing resolution visibility lag by 40 percent.
- Scripted approval automation cutting manual processing time by 20 percent; added visual reporting (bar, pie, trend charts) and personalised analyst dashboard favourites.

Augmented Reality and Virtual Reality Development Intern

July 2024 (40 Hours)

NIET, Greater Noida

Greater Noida, India

- Built a 3D walkthrough environment and circle-game prototype in Unity (C#); created 2 live face-filter AR effects in Meta Spark Studio, sustaining 60-plus FPS via Vuforia Engine scene optimisation.

Data Science and Machine Learning Intern

August 2023 – October 2023

YBI Foundation

Remote

- Trained supervised ML models for regression and classification including a movie rating predictor; applied full EDA, feature engineering, and hyperparameter tuning; improved recall assessed via ROC/AUC, F1-score, and confusion matrices; version-controlled all pipelines on GitHub.

Projects

MindGuard AI – Multimodal Mental Health Early Risk Assessment System

Python, BERT, MobileNetV2, FastAPI, PHQ-9, GAD-7, Weighted Fusion

- Fused PHQ-9/GAD-7 MCQ engine (40 percent), fine-tuned BERT sentiment analyser (30 percent), and MobileNetV2 facial-affect CNN (30 percent) into a single privacy-preserving pipeline; achieved **91 percent accuracy across 240 sessions**, outperforming best single-channel baseline by 10 percentage points; zero data retained post-session; crisis sentinel escalates high-risk flags directly to clinicians. *Published – IJST, Vol. 3, No. 2, May 2026.*

AI-Powered Resume Screener and Job Matcher

Python, Gemini API, Google Vertex AI, Flask, Natural Language Processing, RAG

- Vectorised resumes via NLP and Vertex AI semantic embeddings; LLM-scored candidates against job descriptions; deployed as Flask REST API with **92 percent matching accuracy**, reducing manual screening time by 60 percent.

Real-Time Sales Forecasting and Analytics System

Python, ARIMA, Random Forest, Power BI, Azure SQL, ETL Pipeline

- Automated ETL pipeline into Azure SQL; ARIMA and Random Forest ensemble achieved **88 percent forecast accuracy**; live Power BI dashboard delivers real-time KPI drill-throughs to stakeholders.

Heart Disease Risk Predictor and Full-Stack Food Delivery Application

Python, scikit-learn, SVM, Flask REST API, React.js, MySQL, JWT Authentication

- **Heart Disease:** Classification pipeline (Logistic Regression, Random Forest, SVM); improved recall via feature selection; evaluated with ROC/AUC and F1-score; served via Flask REST API.
- **Food Delivery App:** Full-stack platform with JWT authentication, restaurant listings, cart, and order management; React.js frontend over Flask REST backend with MySQL persistence.

Certifications

Python for Data Science, AI and Development – Coursera (IBM) • React JS – Infosys Springboard • Java Programming – Infosys Springboard

Introduction to NoSQL Databases – Coursera • Data Analysis using R – Infosys Springboard • Data Analysis using Pig – Infosys Springboard

Honours and Awards

- **First Division with Honours** – B.Tech CGPA 8.07/10, Semester 8 SGPA 9.67, June 2026
- **2nd Place** – Google Arcade Coding and Gaming Event (College Level)
- **3rd Place** – National French Language Competition A1 by Prayatana (College Level)
- **Recognised Participant** – GeeksforGeeks Offline Hackathon for Innovation and Teamwork

Languages: English (Fluent) • Hindi (Native) • French (Beginner, A1 Level)
